(a) Declare a national policy which will encourage productive and enjoyable harmony between man and his environment;

(b) Promote efforts which will prevent or eliminate damage to the environment and biosphere and stimulate the health and welfare of man;

(c) Enrich the understanding of the ecological systems and natural resources important to the Nation; and

(d) Establish a Council on Environmental Quality (CEQ).

§ 102–76.40 To which real property actions does NEPA apply?

NEPA applies to actions that may have an impact on the quality of the human environment, including leasing, acquiring, developing, managing and disposing of real property.

§ 102–76.45 What procedures must Federal agencies follow to implement the requirements of NEPA?

Federal agencies must follow the procedures identified in the Council on Environmental Quality's NEPA implementing regulations, 40 CFR 1500–1508. In addition, Federal agencies must follow the standards that they have promulgated to implement CEQ's regulations.

SUSTAINABLE DEVELOPMENT

§ 102–76.50 What is sustainable development?

Sustainable development means integrating the decision-making process across the organization, so that every decision is made to promote the greatest long-term benefits. It means eliminating the concept of waste and building on natural processes and energy flows and cycles; and recognizing the interrelationship of our actions with the natural world.

§ 102–76.55 What sustainable development principles must Federal agencies apply to the siting, design, and construction of new facilities?

In keeping with the objectives of Executive Order 13123, ''Greening of the Government Through Efficient Energy Management,'' and Executive Order 13101, ''Greening of the Government Through Waste Prevention, Recycling, and Federal Acquisition,'' Federal agencies must apply sustainable development principles to the siting, design, and construction of new facilities, which include—

(a) Optimizing site potential;

(b) Minimizing non-renewable energy consumption;

(c) Using environmentally preferable products;

(d) Protecting and conserving water;

(e) Enhancing indoor environmental quality; and

(f) Optimizing operational and maintenance practices.

Subpart C—Architectural Barriers Act

§ 102–76.60 To which facilities does the Architectural Barriers Act apply?

(a) The Architectural Barriers Act applies to any facility that is intended for use by the public or that may result in the employment or residence therein of individuals with disabilities, which is to be—

(1) Constructed or altered by, or on behalf of, the United States;

(2) Leased in whole or in part by the United States;

(3) Financed in whole or in part by a grant or loan made by the United States, if the building or facility is subject to standards for design, construction, or alteration issued under the authority of the law authorizing such a grant or loan; or

(4) Constructed under the authority of the National Capital Transportation Act of 1960, the National Capital Transportation Act of 1965, or Title III of the Washington Metropolitan Area Transit Regulation Compact.

(b) The Architectural Barriers Act does not apply to any privately owned residential facility unless leased by the Government for subsidized housing programs, and any facility on a military reservation designed and constructed primarily for use by able bodied military personnel.

§ 102–76.65 What standards must facilities subject to the Architectural Barriers Act meet?

(a) GSA adopts Appendices C and D to 36 CFR part 1191 (ABA Chapters 1 and 2, and Chapters 3 through 10) as the

Architectural Barriers Act Accessibility Standard (ABAAS). Facilities subject to the Architectural Barriers Act (other than facilities described in paragraphs (b) and (c) of this section) must comply with ABAAS as set forth below:

(1) For construction or alteration of facilities subject to the Architectural Barriers Act (other than Federal lease-construction and other lease actions described in paragraphs (a)(2) and (3), respectively, of this section), compliance with ABAAS is required if the construction or alteration commenced after May 8, 2006. If the construction or alteration of such a facility commenced on or before May 8, 2006, compliance with the Uniform Federal Accessibility Standards (UFAS) is required.

(2) For Federal lease-construction actions subject to the Architectural Barriers Act, where the Government expressly requires new construction to meet its needs, compliance with ABAAS is required for all such leases awarded on or after June 30, 2006. UFAS compliance is required for all such leases awarded before June 30, 2006.

(3) For all other lease actions subject to the Architectural Barriers Act (other than those described in paragraph (a)(2) of this section), compliance with ABAAS is required for all such leases awarded pursuant to solicitations issued after February 6, 2007. UFAS compliance is required for all such leases awarded pursuant to solicitations issued on or before February 6, 2007.

(b) Residential facilities subject to the Architectural Barriers Act must meet the standards prescribed by the Department of Housing and Urban Development.

(c) Department of Defense and United States Postal Service facilities subject to the Architectural Barriers Act must meet the standards prescribed by those agencies.

[70 FR 67845, Nov. 8, 2005, as amended at 71 FR 52499, Sept. 6, 2006; 72 FR 5943, Feb. 8, 2007]

§ 102–76.70 When are the costs of alterations to provide an accessible path of travel to an altered area containing a primary function disproportionate to the costs of the overall alterations for facilities subject to the standards in § 102–76.65(a)?

For facilities subject to the standards in § 102–76.65(a), the costs of alterations to provide an accessible path of travel to an altered area containing a primary function are disproportionate to the costs of the overall alterations when they exceed 20 percent of the costs of the alterations to the primary function area. If a series of small alterations are made to areas containing a primary function and the costs of any of the alterations considered individually would not result in providing an accessible path of travel to the altered areas, the total costs of the alterations made within the three year period after the initial alteration must be considered when determining whether the costs of alterations to provide an accessible path of travel to the altered areas are disproportionate. Facilities for which new leases are entered into must comply with F202.6 of the Architectural Barriers Act Accessibility Standard without regard to whether the costs of alterations to comply with F202.6 are disproportionate to the costs of the overall alterations.

§ 102–76.75 What costs are included in the costs of alterations to provide an accessible path of travel to an altered area containing a primary function for facilities subject to the standards in § 102–76.65(a)?

For facilities subject to the standards in § 102–76.65(a), the costs of alterations to provide an accessible path of travel to an altered area containing a primary function include the costs associated with—

(a) Providing an accessible route to connect the altered area and site arrival points, including but not limited to interior and exterior ramps, elevators and lifts, and curb ramps;

(b) Making entrances serving the altered area accessible, including but not limited to widening doorways and installing accessible hardware;

(c) Making restrooms serving the altered area accessible, including, but
